I am designing an inverter in a DIY environment which outputs 48VDC at 12V. The inverter is based on a UBEC circuit. I am not

able to grasp the role of the central pad in these circuits. As per my understanding, this pad is used in some transformer configurations to shift in the mid points of the primary winding. A: You should not worry about the pads on the AC side. There is no need to add any different circuitry to the DC side: simulate this circuit – Schematic created using CircuitLab Article content continued But it was not just about questionable old figures such as Bernard Lalonde, a Montreal entrepreneur who built the world’s largest dairy company, and Adrien Arcand, a former Newfoundland newspaper reporter who founded the hockey magazine Habs Heroes in 1978. Such men were figures of fun to
