B737 300 400 500 Continental CBT 64 Bit

The average daily traffic was 500-600,000 passengers in the mid 70s. According to Richard Bower, they carried the world's longest commercial route, London-Singapore. They were considered the flag bearer for British Regional Airlines. The 707 was Britain's first jet and first high-speed flight. The first route flown was London-Kingston, using a de Havilland Comet.. Passenger numbers grew to an average of 500,000. After a merger with Island Aviation to become British Airways, the airline carried well over 1 million passengers a year. The first fatal accident involving a 707 occurred on the London-Dubai route in 1979 when TWA Flight 718 crashed while on approach to the Dubai airport due to a loss of control, followed by fire and explosion. The fire was the first one on a 707. The first fatal accident to occur on an oil tanker was on the London-Los Angeles route in 1975. The flight had been lost for 41 hours and 123 mi and was at an altitude of 12,000 ft. The accident was caused by the failure of the oil pump which was caused by a leak through a valve in the fuel pipe to the engine. Flight 718 was carrying 140 passengers, ten of whom died in the crash. Two hundred and five people were killed in the crash, including the entire Bombay Air Disaster. The disaster received international coverage because of the death of the first American on a scheduled commercial jetliner flight. An international investigation determined that the crash was caused by several factors. Other contributing factors were the failure of the autopilot, the loss of hydraulic power to the stabilizer, loss of control of the aircraft from the failure of the autopilot and rudder hardover. Contributing factors, according to the report, were the design, construction, maintenance and operation of the aircraft. The inquiry pointed out that there had been a lack of adequate maintenance for years prior to the accident. Aircraft News, 16 January 1977: At a seminar held in London, where the FA86 was being discussed, 'Mr**'**, the chief test pilot of the Aircraft Company, described the aircraft's scheduled service as 'a better venture than any other executive flight'. Bombardier asks 18 Bombardier Canada Inc./Bombardier Aerospace and Alenia Aermacchi of Italy to provide the former with engines for the jets being built for Bombardier and the latter with landing gear systems for use in these and future aircrafts.
