KEYMACRO is an add-in for Microsoft Excel, that has been designed to assist in programming. KEYMACRO will add mouse macros (shortcuts) to any selected cell in the Microsoft Excel worksheet, allowing you to control that cell with a single mouse click, instead of using your keyboard. KEYMACRO, once activated, is ready to accept and respond to mouse clicks. The steps to add a macro are shown, when the keyboard shortcut 'I' is pressed. The macro will work even if you do not have Microsoft Excel open, or if Excel is running in 'Full Screen' mode, as the macros are only visible within

the program. KEYMACRO is very user friendly and has a simple to follow manual. It is a great addition to any program that relies on Excel, and is available in two different language versions, English (US) and English (UK). Support for User-Defined Shortcut Keywords (UDSK) are available. UDSK can be a single letter, a combination of letters and/or numbers. In KEYMACRO, keywords can be used to program macros to be run by pressing the letter, number or keyboard combination. Included is a built in, editable version of Microsoft Excel, which allows you to save your own macros and pass them onto others.
