S7-plcsim v5.5 was originally posted in March, 2009. I just got the email that Siemens was.
 $(p) = -p^{**2} + 21*p - 13$. Let i be $g(20)$. Suppose $-12*a + i*a + 44 = 0$.
 What is the remainder when u is divided by a ? 8 Let $s = 3 - 1$. Suppose $3*r = -5*z + 20$, $-2*r + s*r - 22 = -5*z$. Suppose $-84 = -0*w - r*w$. Calculate the remainder when 40 is divided by w . 19 Suppose $3*c + 3*o = 6*o - 6$, $0 = 3*c + 3*o - 24$. Suppose $-5*z = -5*n - 190$, $-2*z + z = -c*n - 34$. What is the remainder when z is divided by 16? 14 Let $v(u) = 11*u^{**2} + 1$. Let $l = -121 + 123$. Let $z(f) = -f^{**3} - 6*f^{**2} - 5*f + 5$. What is the remainder when $z(-5)$ is divided by $v(l)$? 9 Let $b(d) = d + 1$. Let g be $b(-3)$. Let t be $-1 + 1 + 1 - g$. Suppose $t*u - 12 = -2*u$. Calculate the remainder when 5 is divided by u . 2 Suppose $2*v - 3*v + 1 = 0$, $-8 = -r - 3*v$. Suppose $r*q = 3 + 7$. Calculate the remainder when q is divided by 2. 0 Suppose $6*v - v = 15$. Calculate the remainder when 20 is divided by v . 2 Suppose $w - 3*o = -0*w + 20$, $4*o = -2*w + 20$. Calculate the remainder when 30 is divided by w . 5 Suppose $0 = -2*x - 2*x + 12$. Suppose $-d = -5*1 - 4*d + 39$, $-4*1 + x*d = -3$. Let $o = -4 + 8$. What is the remainder when l is divided by o ? 1 Suppose $-o + 6 = -$

 Q: Tennis play help/suggestion I have a friend who is 6'4" and I am 6'3". He plays with a coach, and his coach is saying that he likes my friend to serve against short hitters and me to return against the taller players. My friend always serves right-handed but sometimes starts the point from the left-handed serve. Right now I usually send him over the net to hit the ball, but sometimes he hits a weak return. I feel like I should tell him that the best return is mid-volley, which is to hit hard a couple of steps over the net and then go to full power. Should I tell him that the best way to hit is to hit a shot that can be lobbed back? Or should I let him hit what he wants to hit, although he doesn't hit an overhead with it much, often just a serve? I am confused, can someone help me?
 A: If you don't want to give him advice then good. People get all obsessive about their games. They figure out if your advice is good because of whether it is useful to the person they are playing. Tell him the truth, he may not care whether he gets advice or not. A: I would recommend that you do it either way. He has a long way to hit that ball, so either way it will land safely on the court for him. There is a more pressing issue of your friend's serve. You may consider suggesting that he use a two handed serve, at least at the beginning of the point where his return will be less effective. This would also give him more of a chance to get the ball on the ball, as opposed to having the ball sail by on a touch up. I agree with the comments about the height difference. The taller guy is the player with the advantage, so he should be approaching the net more aggressively. The advantage is that the ball has a longer time to travel before meeting the ground, which in turn gives him more time to think about where to place it, especially if it hits the net, which has a larger margin for error.
 Q: Strange behavior in PHP debug mode I have strange behavior of 3da54e8ca3
