Image with no alt text. Adobe Cs6 0 Master Collection Win Oxs Keygen Xforce Zip Things to keep in mind I am storing a file containing non-ASCII characters. The file name is based on the User-Agent request header. When retrieving, I am not sure if the retrieved file contains the file name (or even the file) when splitting on the question marks. The list of users to check is generated dynamically and is likely not finished. I'm writing a log file so I don't mind if the program runs slower (and hence the users get more attempts) while the code is taking time. A: I'd use subprocess.Popen and the wait keyword. e.g., import subprocess; subprocess.Popen("curl --head ", shell=True, stdout=open("3da54e8ca3
