```
Schema::create('users', function (Blueprint $table) { $table->increments('id'); $table->string('name'); $table->string('surname'); $table->integer('age'); $table->string('email')->unique(); $table->string('phone'); $table->string('address'); $table->string('token'); $table->timestamps(); }); and
```

```
Schema::create('cart', function (Blueprint
    $table) { $table->increments('id');
        $table->string('product_name');
        $table->integer('quantity');
        $table->timestamps(); }); and
Schema::create('users_cart', function (Blueprint
    $table) { $table->increments('id');
        $table->integer('user_id')->unsigned();
        $table->integer('cart_id')->unsigned();
        $table->timestamps(); }); And I want to show
the quantity of the product from the users table
that was added to the cart table. I tried the
following query builder, but I can't find any
error. $cart =
DB::table('cart')->join('users_cart', 'cart.id', '=',
    'users_
