History AutoCAD Product Key was originally released in 1987, a C++ and Graphical Interface 2.0-based version named as AutoCAD/2000 by EMEA Software, It was originally based on the original drawing program from Dynamic Data's AutoCAD AS0, Dynamic Data had a program name of VisDraw. VisDraw was founded by Dave Feist, Matt Stauffer, Bill Ransom, John Heron, and Tom Kieckhefer, and was released in 1982. AutoCAD has evolved since its inception into three versions, AutoCAD, AutoCAD LT and AutoCAD R2010. AutoCAD LT AutoCAD LT (AutoCAD Label Technology) is a version of AutoCAD for use in mass-customized production environments. It was launched on March 31, 1999, with a version of the program that had been available since the late 1980s, and the addition of a customer-oriented web-based interface. This new release is named AutoCAD LT 2010. The program was designed to allow design and engineering companies to design and build a single product using the programs features and capabilities. The company was acquired by Autodesk in 2006. In November 2011, AutoCAD LT announced that they had turned off the Windows license free per year after a number of free license users complained about the product to Autodesk. In April 2016, AutoCAD LT was updated to include a revamped user interface. AutoCAD R2010 AutoCAD R2010 is a modernized version of AutoCAD and AutoCAD LT, which is being rolled out gradually beginning with version 2014.5. With the update of 2014.6, R2010 also began to roll out on the Mac platform. The update brought a new user interface, new functionality and a number of small bug fixes and enhancements. AutoCAD and AutoCAD LT users can use the same file with R2010 as they did with 2010.5 or earlier. The biggest change in R2010 is the new user interface. The drawing area (working area) is integrated in the center of the screen. The interface is similar to Microsoft PowerPoint in this regard. There is a small 2-D scroll bar along the top which can be used to navigate through the drawing's layers. This is similar to the layer navigation system found in AutoCAD LT 2010. Several new features and enhancements were introduced ca3bfb1094
