An office flatbed scanner and printer is typically included, with the Brother ImageScanner 3500DN E-S1 and the Brother HL-2140DN. There is no optical viewfinder, however. The E-S1 has a flatbed operating mode and a 6.5" x 6.5" (165 x 165 mm) scanner window. A V1.0 firmware was released on May 28, 2007 with more features and higher speed. The scanner is Windows-only, and its interface is Windows-only as well. However, the scanner supports most Linux drivers, and as long as you can run an eSATA-to-USB converter, it is compatible with Mac OS X as well. In addition to a regular V1.0 firmware, there is also a higher-speed firmware, the V2.0 firmware. The V2.0 firmware was released on May 31, 2007. It includes many new functions, speedups and bugfixes. The speed is now based on the CPU and not limited by the CPU. The scanner also has an extra software called the "e-360" (for e-scan 360) and "e-500" (for e-scan 500). The e-360 software is like the regular scanner driver but it can scan 360 images per second (the current maximum can be 600) and save them to a 3Gigabyte hard drive. The e-500 software is like a regular scanner driver, except it can scan 500 images per second and save them to a 5 GByte hard drive. The HL-2140DN scanner is a high-speed scanner with a USB 2.0 interface. It is very easy to setup and to use. It offers the highest speed among the scanners with its. There is an optional eSATA connection that can be used to connect the scanner to an external hard drive. It has the same features as the E-S1, and uses the same software. The HL-2140DN uses a faster firmware, called V1.2 firmware. There is an HP printer driver available for its built-in 800 x 600 resolution driver. Earlier models of the HL-2140DN (the V1.0 and V1.1) have a V4.0 firmware that is slower than the later versions. This firmware was not bundled as standard. The driver is free and available for download at the Brother website. The HL-2150DN is a more 595f342e71
