Medieval Dungeon Simulator is a hardcore dungeon crawler with randomized dungeons, loads of loot, health bar and flat jump gameplay. [Google Translation] The game is already complete in development, and is currently on Steam Early Access. Here at Platindoom Games we are planning to expand the game into five game modes. If you like our game please be sure to take a look at the Steam store page of Medieval Dungeon Simulator, help us make it even more polished by sharing your feedback, and also check out our previous game, Apegg at Early Access. Our next game is coming very soon! Gamescom was the perfect occasion to grab some quick video moments from the press conference. Eric poses with the crowd, Kotaku are very insistent. He's a good sport in a grey shirt. We're so sorry for, like, the quality on the stream. As a Canadian press we've had shit internet since the last time we did a stream, so we're going to compensate a little bit for our network failing in Germany. We can't do much about that, it's the internet. Medieval Dungeon Simulator is an action RPG with hardcore procedurally generated dungeons, hundreds of items, and thousands of ways to die. Players play as the last knight of the Kingdom of Caldoria. Based on real medieval weapons and armor, players will run, jump and fight their way through a series of randomly generated dungeons. Each dungeon will contain chests, weapon, and armor drops that can be opened to gain loot and upgrade your weapons. No two dungeons will be the same, and one wrong move can mean instant death. Medieval Dungeon Simulator is currently in Alpha testing, and is planned to release on Steam on Steam Early Access, as well as on all consoles and mobile devices as an Android/iOS app. All the stories we told about Intervision Studios before were true. We said they were a bunch of developers with a dream. Then they did it. Not only they made it happen, they made it happen on their own. They did it in less than one year, putting all their money in the game and any other thing they had available to spend. Intervision released Medieval Dungeon Simulator on Steam Early Access this past October. Now, in a very short amount of time they have created a game with thousands of items, generated dungeons and hundreds of ways to die. All of this has been achieved without a publisher or publishing company. We have seen it happen. We have

In the alternate world of Blaze Revolutions you're hunting creatures that only come out at night. They're called Phantoms, and they're stealing your lives. You will explore caves, revenge camps, dead cities and ghost towns and solve puzzles to keep your Blaze at full power. I think the gameplay looks pretty good right now. You will get three different drones that you can equip with each with different abilities, and then you will get six different weapons that you can blast your enemies with. You can attach bombs to them and throw them away into the air and explode them when they reach the ground. It's basically a tense survival game. **Gameplay Video:** You can find the gameplay video at [PjK-b8Bbtc](#) **Ghetto Gamer Review: Blaze Revolutions - Early Access Game** Welcome to GhettoGamer's first 'Full' Steam Review where we review a game that is available to purchase in full on the SteamStore. What's new in Blaze Revolutions:

: A Dinner Review Blaze and Little Bean have to dress up, and go to a restaurant for a new restaurant review. Also, they have to eat American food. First impressions: Our waitress greeted us with a perkyness that nearly made me cringe. It didn't appear to be genuine. The gentleman behind the counter kept his head down on his hands for a long time and looked like he was displeased with our presence. It would seem that they had our number from the start. After the brief tour, the manager was so pushy that I felt slighted. Is the American hospitality culture so completely different than in the UK? It's too bad that they seemed so insincere - and the restaurant smelled like moth balls, which doesn't allow you to fully buy into our quaint and friendly experience. Without the nice people and the charm, the restaurant would lose its appeal. After all, I suppose if what you want is the real thing, then you take what you get. Blaze and Little Bean weren't impressed by the restaurant decor and didn't go with the flow. They sat with hands in laps as they had to make conversation. The situation made the evening feel like an awkward dance, delaying the actual eating. Little Bean had difficulty fitting into her pants due to her bigger frame, and Blaze started to suffer from nerves because he felt that two people who did not know each other would find it difficult to act friendly. They decided that it would be easier to pretend that they didn't know each other, and therefore were not wasting their time. We waited 15 minutes for our food, which was a metaphor for the rest of the evening. We didn't have an uncomfortable laugh either. The food was the costumer-friendly food, with a focus on three main attributes: salt, fat and sugar. The chicken wings at their first restaurant review tasted as though the moths had been inside the wings and mousetrapped them at least three times. They looked like they had been bought before they were seasoned, then put into a vacuum-sealed bag, taken to the store for nine dollars, and returned to the less-than-bright microwave.

The meal tasted like it might have been real. There was a smell like heard of chemicals that was reminiscent of bleach. I hated listening to the solos by Little Bean, but she told a funny story during one. The vegetables on my plate smelt soapy,
