## **What's new:**

**HUGE OUTCOMES & NEAR UNREALISTIC ANIMATIONS.** Fighting as a character with a big heart with huge damages for non-human characters and a big speed for human characters is just as fun as fighting with strong spells and items.

**CUSTOMIZE YOUR CHARACTER & UNLOCK CREDITS** As a character grows in strength and develops powerful abilities, you will be able to assign points to your skills, weapons, and items. You can also develop critical items, such as cat ears that increase your critical damage. The system allows you to freely customize your character.

**MAKE BAD LUCK AND BADNESS GO AWAY!** The guild system is built into the game. Guilds are made up of members and divided into groups based on skill level. At the same time, guilds can open guild chests in dungeons and obtain bonus rewards. If you want, you can invite specific people to your guild.

**LARGE AND EXCITING BATTLE ROOMS WITH A LOT OF INFO ON EACH TURN.** Each battlefield is high-definition and three-dimensional, and the information in the battlefield during battle will explain every mechanism. The system efficiently allows you to make the best decisions and enjoy the best fighting experience possible.

A Minecraft server is designed to store data about players and items within the world (maps, blocks, items, chests, inventory, etc). It is the main application a world has to run within to allow everything to work. A server cannot transfer items to the player (when a player logs in), but can trigger events and spawn items. Similarly, a server can update itself, changing its data. A server keeps track of what it has sent to players. It can also keep track of various other things within the Minecraft such as creative mode, pre-made worlds, and plugins (such as Chests). Servers run on a regular schedule, but when they do not run, it can be configured to. Minecraft servers are powered by the MCPE Minecraft Server Plugin. It is also a portable one, meaning that it can also be set up on an exe that does not contain the server. This is helpful when you are using modpacks or custom maps that change how many blocks spawn, for example. MCPE is available in Python, C++, Java, and AS3. We will talk about each version below. To start, you should install Python. On Windows, you should install the Microsoft Windows SDK. Then, you can set up a Python Server. Open the Start menu, type Notepad, and hit enter. This should bring up a text editor (Notepad) on the Desktop. Then, type into the text box: "C:\Program Files\MCPE (Portable or Hosted)\MCPE\Python\mcp" This will open a text editor titled Notepad. Check the Python box, type in start -V. Then, type in: python -V Then, hit Enter. You should see the version of Python you are using. If you want to use the AS3 version, you can change this line to:
