FIFA is a soccer simulation created by EA Canada using the Frostbite Engine. It was developed and released for the PC in 2001. The game quickly gained a cult-like following and has continued to grow in popularity across all platforms and is now one of the most played sports games in the world. What is FIFA Ultimate Team (FUT)? FIFA Ultimate Team is an online matchmaking mode in which players build their own team by purchasing new players from and earning cards for existing players (via gameplay). Traditionally, FUT is a mode that players access through the yearly release of the FIFA franchise. How do I play FUT? FUT is available on a yearly basis, updating the game with new players, kits, and more. Players

who purchase a yearly license will be notified via email when new content is released. Players are able to build their own team and compete with other players online through a global leaderboard and system to rank players based on their level of skill. Players can sign new players into FUT using two methods: the FIFA Mastercard and the My Player card. The FIFA Mastercard allows players to spend points earned from gameplay and rewards to purchase new players. Players must have earned the minimum FIFA Mastercard Bonus Points of 2,000 in order to purchase new players (1,000 if they have played FIFA for a short period of time). Players can also purchase players using their My Player card and earn points through gameplay. Can I buy FIFA Ultimate Team on my own? Players can sign their new players in FUT via the FIFA Mastercard, but only if they have already purchased a yearly license. You can register for the FIFA Mastercard, [here](#). What can I do in FIFA Ultimate Team (FUT)? FUT is designed to function as a team-building experience, meaning that players can't purchase players individually. Players can create a My FIFA Team where players can purchase their own cards in order to build their own teams. Players can also compete on the global leaderboard to see what players others have purchased. In the past, FIFA has added new players to FUT on specific occasions, such as World Cup years and Electronic Arts' own Traditions, a Summer-Sale that was held a year following a major FIFA release. The FIFA Mastercard also grants access to exclusive members-only content and rewards, including new items, players, kits, themes, and more.
