Internet web services AutoCAD's "About AutoCAD" web page is accessed by a search engine, and can be used to find further information on AutoCAD. AutoCAD also has APIs that allow online access to CAD data from a web browser. Sales and business The AutoCAD User Interface and AutoCAD.NET were later integrated into AutoCAD X and AutoCAD LT. Both also contained key features of AutoCAD as Version 2018. Licensing AutoCAD LT requires a perpetual license. The license includes standard one-year support and maintenance. AutoCAD LT has three levels of licensing that depend on the number of users in the installation. AutoCAD LT 2017 and AutoCAD LT 2018 are available only on a per-user license basis. This means that the user is charged a license fee each time they use the software. The user can only use the software on a single computer. AutoCAD LT 2007 and AutoCAD LT 2008 are available on a per-machine license basis. This means that the license fee covers the number of machines installed on a network. Each computer or device may be used by multiple users and may be accessed from multiple computers. Autodesk eLicensing was introduced for AutoCAD LT 2017 and AutoCAD LT 2018. This allows users to use a shared license across multiple machines and network locations. This type of licensing removes the need for a user to purchase a license for each machine. AutoCAD LT 2007 and AutoCAD LT 2008 are available under the eLicensing program. This means that the user can choose to purchase the license once and pay one fee to Autodesk. The user can use the license on any number of computers or devices, but each license is specific to one machine. For the Home/Business license, AutoCAD LT 2007 and AutoCAD LT 2008 are available on a one-time purchase basis. This means that the license fee covers all computers that are not covered by a machine license, such as family computers. The license can be installed on a computer for a one-time fee. For the Enterprise license, AutoCAD LT 2007 and AutoCAD LT 2008 are available under the eLicensing program. This means that the user can purchase an Enterprise license once and pay
