Firefox gives you the flexibility of downloading extensions and plug-ins for a web page without having to fill a whole software package. However, this flexibility also means that you have to be careful with the addons you choose. The extensions tend to be less reliable than the large programs. When you browse for an image on the Internet, you are probably looking for a specific picture. You can save the web page link that contains the image by clicking on the Download image as option on the right side of the page. Then you can load it into your photo software by double clicking on the picture.
