
Tor Browser V 1.3.26 (Portable)

Download

The portable mode allows you to use Tor Browser in a variety of operating systems. It can be launched directly from the ISO/IFO or as a standalone executable. It also allows you to have the browser open on demand, and to start it with special parameters. The portable mode is based on the Mozilla Firefox ESR release as packaged by the Tor project. On systems with 64-bit platform support, it also uses the GNU GLib toolkit version 2. The portable version of Tor Browser has no connection to the Tor network, but it does use the Tor network for the initial Tor circuit. It may also have a delayed first circuit and thus may be less secure than the others listed in this article. If you run into problems, use the Windows.EXE file available on the Tor Project download page instead. Once you have downloaded and installed the Tor Browser Portable ISO, follow these instructions to boot a program from it. --- Boot the ISO/IFO/LiveCD/LiveUSB on a computer. You can boot the ISO/IFO from a hard disk, USB flash drive or CD-R. The ISO/IFO can be burned to a CD or DVD at the end of the process. The booting procedure is the same in all cases. Boot the ISO/IFO/LiveCD/LiveUSB on a computer.

While the ISO/IFO is booting, open another computer and install Tor Browser (Installer screen step 3) or another program (this is only necessary if you want to open Tor Browser right away). Boot the ISO/IFO/LiveCD/LiveUSB on a computer. The boot procedure is the same for all operating systems Boot the ISO/IFO/LiveCD/LiveUSB on a computer. Then, select the option to start the computer from the OS you are running. This will cause the operating system to load an application/program from the ISO/IFO/LiveCD/LiveUSB. You must have the ISO/IFO/LiveCD/LiveUSB loaded in the drive. Then, follow the instructions of the respective operating system to get to the application/program.

Tor Browser V 1.3.26 (Portable)
