LOS ANGELES-(BUSINESS WIRE)- Let's get personal: Enhance and ensure a great photo with music to customize faces thanks to new features of Adobe's flagship product for photographers, Adobe Photoshop CC. Guided by machine learning technology, these tools can help you improve your products, in record time. Adobe Photoshop is considered the industry-leading tool for photo editors and designers. Although it has seen a steep climb in popularity over the past few years, the most recent version, CS6, is currently the only option available for those who operate a physical copy. Adobe now has a subscription-based word of the year operation that is making it easier for Adobe Photoshop users to be up-to-date with new software features. It's designed to give users the best experience possible and is projected to launch in summer 2014.
