What's New in the?

If you are playing Hearthstone for quite some time and have gathered hundreds of cards to make dozens of decks, then you are probably looking for a way to keep track of them. As the name suggests, Hearthstone Deck Tracker is a tool designed to manage your cards and decks better and help you improve the performance in the game. Allows you to create decks for all modes and events The app comes with a modern, user-friendly interface and consists of three main areas, namely the far left window where you add your decks, a general statistics of the games played and the current deck cards and stats in the far right. The app includes all possible cards released and enables you to create the ideal decks for all types of events, be it arenas, battlegrounds, dungeons, tavern brawls or duels. The decks can be constructed from scratch as well as imported from various sources, such as the web, a deck code, last game played, files, IDs and the clipboard. You can also export the decks directly into the game, as screenshots, to clipboard or XML file. Keeps a summary of progress and personalized statistics The idea behind the tool is to provide live game tracking for arenas, duels and battlegrounds so that you can make the necessary changes on your decks based on how well they performed. In addition to managing your decks along with the changes made, the app enables you to review games played and share or analyze them so that you can come up with a better strategy. For battlegrounds, the tool allows you to check out the last known board used by your opponents, explore what minions you can find on various tavern tiers and get an estimation on how likely you are to win, lose or tie the next match based on your stats. A Hearthstone companion app that can help improve your decks All in all, Hearthstone Deck Tracker is a straightforward utility that enables you to manage your cards and decks more efficiently. Not only does it enable you to create custom decks for various play modes, but it can also improve your performance thanks to the statistics tracking. With Pokemon GO getting more and more serious, the app gained a lot of attention and users. What started as a game where you had to find and capture Pokemons has become a real-life adventure. But there are so many people that play Pokemon GO that finding a safe place is a challenge. So you can add a Google map to your favorite location and view it with the Pokemon GO app! Free of charge and with no advertising. How to use: - Select the map to the location you want to add on - Select the view to show - Press the button to add The map is shown in a web view and is much better to look at. How to remove a location You can remove the location you added. Just select the map and press the button to remove. If you want to

System Requirements:

The game system is highly optimized on many platforms, however, on some platforms, the minimum requirements may vary: How to get the game Game Development Kit (Windows, macOS, Linux) Unity package (Windows, macOS) The game is distributed as standard "installer" so you can download it, install it and start playing. (Windows, macOS, Linux) How to update The game updates automatically to the latest version. To update to a new version of the game automatically, please go to
