I have below models class Label :assets has_many :users, :through => :assets end class Asset true belongs_to :user end class Profile :assets end class User :labels end Here is the input that a user can upload files. We assume that a user has_many Asset records and Profile records. asset1 has_profile1 asset1 has_profile2 asset2 has_profile1 asset3 has_profile1 And in the dashboard we should be able to show the list of assets. Since it can be a user's portfolio or other user's portfolio. Profile model should also be editable since a user can edit his/her users. How can I detect which kind of relationship each Asset is? We need to be able to display the username of the profile and the last name of the user to a user.
